KELLY'S *Book of Bargains!*

Certified True-to-Name Fruit Trees

Catalog

1941

KELLY BROS. NURSERIES • DANSVILLE, N. Y.

William F. Kelly, President

John W. Kelly
Secretary and Treasurer

James B. Carmody, Vice-Pres.

A Message to Our Friends and Customers

IN PRESENTING TO YOU, our good customers and friends, this 1941 Book of Nursery Bargains, we wish to thank you for the generous patronage we have received.

No nursery is more conscious of its obligation to its customers to supply high quality nursery stock at reasonable prices.

We utilize every facility to handle your orders in the most efficient manner, and consider no transaction completed unless the trees and plants give complete satisfaction.

The thousands of orders we receive each year through the recommendations of satisfied customers, bespeaks the confidence placed in us, and we assure you of our intention to continue our fair policy that will warrant the continuance of this confidence.

Here in Dansville we have under cultivation several hundred acres of nursery stock. The varieties we offer are all tried and tested. It is not our policy to offer novelties which very seldom prove satisfactory.

We welcome correspondence with you, and are always ready to supply you with the latest up-to-the-minute information on horticultural problems.

Sincerely yours,

KELLY BROTHERS NURSERIES

SATISFACTION GUARANTEED

We guarantee every tree or bush to be up to grade specified or better. We also guarantee arrival to customer in first class condition. If through delay or mishandling in transit, trees or bushes are not in first class condition on arrival, notify us immediately, and we will make prompt, satisfactory adjustment. Our trees are not sold by height only. We grade and sell our trees both by height and caliper, as we believe this is the only way of giving entire satisfaction to the planter. Our stock pleases or we cheerfully refund money advanced.

Kelly's Upland Grown Trees

FREE DELIVERY SERVICE!

Our liberal offer of **FREE DELIVERY** by one of our fleet of trucks . . . where the size of the order justifies the expense . . . has met with wide response among our customers. This year we repeat our offer to deliver large orders **FREE** by truck direct to your farm. Write us for complete details.

There is no delay in transportation and the stock reaches you within 24 hours after it is dug or taken from our modern cold storage.

ORDER EARLY—As soon as this Catalog reaches you send in your complete order with definite shipping instructions. We will then set the trees aside for you awaiting the desired shipping time. If you prefer you can leave the time of shipment to us and we will ship so as to reach you at the best time for planting in your locality.

USE ORDER SHEET—Please make your order out on order sheet enclosed. To avoid mistakes and delay write letters on a separate sheet of paper.

SEND CASH WITH ORDER—It is our cash with order—direct from nursery to planter—method of doing business that enables us to sell trees of the highest quality at such extremely low prices. Remittances should be made by post office or express money order, bank draft or registered letter. To large buyers, when satisfactory reference is given, we will ship C.O.D. provided one-fourth the amount of order is sent in cash when order is placed.

BOXING AND PACKING FREE—We make no charge for boxing or packing. Prices are f. o. b. cars at Dansville.

QUANTITY RATES—Take advantage of our lower rates for quantity purchases. For less than

ten trees of any variety remit at **each** rates. A purchase of ten to fifty trees (assorted if you wish) entitles you to the ten rates, and an order for fifty trees or more entitles you to the low hundred rates.

WE STRIVE TO AVOID MISTAKES

But in the event that any nursery stock sold by us should prove untrue to name under which it is sold, we hereby agree, on proper proof of such untruthfulness to name, to replace the original order or to refund the purchase price.

OUR REFERENCES

As to our responsibility and reliability, we refer you to the Merchants and Farmers National Bank, Dansville, N. Y.; Groveland State Bank, Groveland, N. Y.; . . . to any person whose letter appears in this catalog, or to your State Experimental Station or College.

PLANTING SEASON—Trees can be planted any time during their dormant period. We ship all Winter to Southern States, but our regular Spring shipping season opens about the first of March and continues well into June. Fall planting season begins about October 15th and extends until ground freezes solid.

Kelly's Certified APPLE TREES

**OFFICIAL CERTI-
FICATION TAGS
GUARANTEE EACH
TREE TO BEAR
TRUE-TO-NAME
FRUIT!**

MACOUN

A late McIntosh type apple ripening about ten days later than McIntosh. Dark red with whitish close grained flesh. Fine quality. A heavy and regular bearer. Introduced and recommended by the New York State Experimental Station. November.

We can furnish **ONLY** the following list of leading Apple varieties with Certification Tags attached:

Baldwin	Northern Spy
Cortland	Red Gravenstein
Delicious	Red Spy
Early McIntosh	R. I. Greening
McIntosh Red	Rome Beauty
	Stayman's Winesap

**Red
Delicious**

In addition to inspecting for trueness to name all of Kelly Brothers Apple Trees, Professor J. K. Shaw has attached to thousands of trees of each of the leading commercial varieties the Official Certification Tag of the Massachusetts Fruit Growers' Association. This tag bears on its face the name of the variety of fruit the tree is certified to bear, and on the reverse side, the official stamp of the Massachusetts Fruit Growers' Association.

Owing to the cost of attaching Certification Tags, we are obliged to make a slight additional charge for trees with Certification Tags attached.

Cortland

This year Professor J. K. Shaw and his assistants of the Massachusetts Agricultural Experiment Station inspected all our Apple Trees for trueness-to-name. You will find below a letter from him verifying this statement.

To you, both our old and new customers, this means that no matter what variety of Apple Tree you care to order, you can be sure of having it True-to-Name when it comes into bearing. There is nothing more important than this, when you have spent time and money raising a tree to the time of its producing fruit.

STATEMENT OF INSPECTION

Amherst, Mass.
October 9, 1940

To Whom It May Concern:

This is to state that all the salable apple, cherry, and one year plum stock now growing in the nurseries of Kelly Brothers Nurseries, Dansville, New York, have been examined for trueness to name by A. P. French, O. C. Roberts, and L. Southwick and, as they now stand in the nursery row all trees are, to the best of our knowledge and belief, true to name.

J. K. SHAW,

Research Professor of Pomology

Kelly Brothers Nurseries,
Dansville, N. Y.

Lanesboro, Mass.
June 3, 1940

Gentlemen:

It is nearly fifty years since I began buying trees from you. Your trees have always been very satisfactory, and true to name. This year you exceeded your past record as the stock you sent me was absolutely the finest lot of trees I ever bought, and I have purchased trees from nearly every nurseryman in the United States. It is a pleasure to deal with a nursery so fair, and dependable as you have always been.

Sincerely yours,
GEORGE G. WALKER

FOR A COMMERCIAL ORCHARD—OR JUST PLANT KELLY'S FAMOUS TRUE-TO-

Whether you have room for only a few trees in your back yard, or plan to plant a large orchard . . . you'll get best results with Kelly's Apples.

We say this with confidence, because **our trees are grown under the most exacting conditions for your protection!**

Starting with a whole root seedling our trees are propagated by the budding method . . . the best, and most expensive way.

Each year we go direct to commercial bearing orchards, to cut our bud wood from trees that show the best color, and bearing qualities.

This is what gives Kelly's trees the good foundation that assures you of permanent, healthy growth, disease-free trees, and heavy crops year after year.

We recommend the following varieties as most profitable to the planter:

Summer Varieties

ANOKA (New)—A new variety which bears prolifically 2 to 3 years after planting. Not a commercial variety in the East. Large, red striped, ripens soon after Yellow Transparent.

CARLTON (New)—Desirable for Home Use and Roadside Markets. Annual bearer. Color and size similar to Red Astrachan. Flesh white. Ripens early September.

EARLY HARVEST—An old variety still holding popularity because of its large size and early bearing qualities. Fruit is pale yellow and of fine flavor. August.

GOLDEN SWEET—Large pale yellow fruit with very sweet flavor. August.

LODI—A new fruit that closely resembles one of its parents, Yellow Transparent, but the fruits are larger and ripen a little later. An annual bearer that is becoming a commercial variety. Tends to bear young. August.

MELBA—A new McIntosh seedling from Canada. Fruit is attractive, with bright crimson over pale yellow color. Good size and pleasantly flavored. Season shortly ahead of Early McIntosh, adapted for roadside stand and home.

RED ASTRACHAN—Tree hardy and good bearer. Fruit very handsome, large, round, nearly covered with deep crimson, overspread with thick bloom; juicy and good, though rather acid; one of the best of the summer varieties. August.

SWEET BOUGH—Large, pale yellow, sweet, tender, and juicy. Tree a compact grower and abundant bearer. One of the best early sweet apples.

YELLOW TRANSPARENT—Tree upright, and a very early and abundant bearer. Fruit of good size; skin clear white turning to a pale yellow; flavor acid and very good. August.

EARLY McINTOSH

For home orchard or commercial use this is the ideal early variety to plant. Resembles its McIntosh parent with its handsome red color and uniform round shape. The tree is a vigorous grower, hardy and productive. It is an annual bearer, and early thinning is recommended. Under favorable conditions of growth it comes into bearing at an early age. Besides pleasing the taste, this early apple pleases the eye. The flesh is white, tender, and juicy with fine flavor. Ideal dessert apple. Ripens in August.

Early McIntosh

A FEW TREES NAME APPLES

Autumn Varieties

FALL PIPPIN—Very large, yellow, tender, juicy, and rich. A general favorite as a fall cooking apple. Pleasant, aromatic flavor when eaten. Tree is vigorous, hardy and productive.

FAMEUSE (Snow Apple)—Hardy, medium size; deep crimson; flesh is snowy white, tender, melting, and delicious. Tree vigorous with dark wood; one of the finest dessert fruits and valuable for market. Ripens in November.

POUND SWEET (Pumpkin Sweet)—A very large, round, yellow, russet apple, very sweet and rich. Tree a vigorous, rapid, upright grower; valuable. October and November.

RED DUCHESS—Red sport of Duchess. Bears at an early age, good size, juicy, subacid. Very hardy. September.

RED GRAVENSTEIN—A new red sport, much more attractive than its parent. Differs from the old Gravenstein only in the solid dark red color of the fruit. Should be planted in place of Gravenstein.

WEALTHY—Beautiful, moderate sized, brilliant red apple, fine quality, one of the best of its season; is relatively a good keeper. Owing to the hardness of the tree, its adaptability to cold

Wealthy

climates and early bearing habits, can be profitably planted as a filler. Season October to January.

WOLF RIVER—Very large, yellow striped with bright crimson. Excellent for cooking and a long keeper. September to December.

• MILTON •

This handsome new apple of the McIntosh type ripens with Wealthy and a month before McIntosh. The tree is hardy, vigorous and an annual bearer. Color is beautiful pinkish red with heavy bloom. Flesh white with flavor more sprightly than McIntosh.

Winter Varieties

BALDWIN—Long a favorite with commercial orchardists for which no substitute has yet been found. Yields large crops and is an excellent shipper. Highly regarded as an eating and cooking apple, having a flavor all its own. Fruit is large, bright red, crisp, juicy, and rich. Tree vigorous and productive.

DOUBLE RED DELICIOUS—A very fine colored, solid red strain of Delicious resembling its parent in all characteristics except color.

GALLIA BEAUTY—An introduction from Ohio. This variety is an improved solid red Rome Beauty. Same shape and texture, but seemingly better quality. Truly a beautiful apple that meets with good market demand.

GANO (Black Ben Davis)—Similar but superior to Ben Davis. Large, dark red. Early bearer and good keeper. January to June.

GOLDEN RUSSET—Attractive, yellow russeted apple. Long keeper. Tree a vigorous grower. November to April.

CHOICE OF VARIETIES

McIntosh Red	Cortland
R. I. Greening	Northern Spy
Red Rome	

SPECIAL \$4.00
PRICE

DELICIOUS See illustration Page 4

A large, dark red apple with crisp, fine grained flesh of excellent quality and flavor. A splendid keeper and shipper. Tree one of the hardiest, a vigorous grower with good foliage. A regular annual bearer.

KENDALL

A new McIntosh seedling introduced and recommended by the New York State Experimental Station. Handsomely colored solid dark red. Fruit large with fine grained whitish flesh. Excellent quality and flavor. Ripens about the same time as McIntosh. October.

GRIMES GOLDEN—An apple of fine quality. Fruit medium to large, bright yellow flesh. Juicy and fine flavored. Tree vigorous grower, hardy and productive. Keeps until April.

JONATHAN—A beautiful red apple, highly flavored and of excellent quality, being tender, juicy, spicy, and rich—a splendid family sort and highly profitable for market. Tree long-lived, productive, and an early bearer. November to April.

CORTLAND

A comparatively new apple of the McIntosh type that combines the high quality and flavor of the McIntosh, the ability to stand handling of the Baldwin and ability to hang to the tree of the Ben Davis. Should be planted extensively. An excellent variety to plant with McIntosh as a cross pollinator. November to February. (See Page 5 for illustration.)

Yellow Delicious

McINTOSH RED (Solid Red Strain)

Without doubt the leading commercial variety of New York and the New England States. A very attractive red apple of the highest quality. Hardy, bears young and annually. Flesh white, fine, very tender, juicy, and refreshing with attractive flavor. It is especially desirable for fancy trade.

KING (Tompkins County)—One of the largest red winter apples. Large size and attractive color makes it desirable for home use. November to March.

LOBO—A McIntosh type of Canadian origin. Precedes its parent in season. Larger and darker red with more conspicuous dots. It is primarily adapted for Southern growers.

MEDINA—An improved Delicious, ripening later and prolonging the season of that variety. Larger and more attractive than Delicious.

★ NORTHERN SPY

A leading commercial variety. Fruit is large and very attractive, being of bright red color with a delicious bloom. Flesh is juicy, crisp, and excellent for dessert or culinary uses. Its fine reputation brings high prices in the market and the fruit is always in demand. Fruit keeps well in storage until April or later.

ORLEANS—Another apple of the Delicious type. Ripening about the same time as Delicious, but a longer keeper, more attractive and larger fruit. Bears early, annually, and heavily, and is resistant to scab.

RAMBO—Red and yellow. Hardy and productive. October to December.

RED SPY—A new red sport identical with Northern Spy except that the fruit is a solid bright red without either stripe or splashes. Much handsomer than its parent. An excellent commercial sort. Tree is hardy and productive.

NORTHWESTERN GREENING—Tree a splendid vigorous grower, quite hardy. Fruit large green, becoming yellowish green when ripe. Sub-acid flavor. October to March.

OLD WINESAP—Medium size dark red apple of good quality. Bears early, abundantly, and regularly. December.

OPALESCENT—Very handsome, large, dark crimson apple. December to March.

ROME BEAUTY—Yellow and red striped apple of excellent quality. Prolific annual bearer. Early bearer and good keeper. Profitable commercial sort for New York, Ohio, Pa., and W. Va. December to May.

RED ROME—Another new red sport of Rome Beauty, and like Gallia Beauty is identical with its parent in all characteristics except fruit is a solid red color.

SMOKEHOUSE—Yellow, mottled with dark red. A fine flavored dessert apple. October to March.

SPITZENBURG—High flavored, dark red. November to April.

STARK—Large, red and yellow striped. Hardy. A reliable cropper and very productive. January to May.

STAYMAN'S WINESAP—Fruit medium to large size. Skin smooth, slightly striped, coloring to dull red. Productive and early bearer.}

SWEET McIntOSH—Resembles McIntosh in appearance, flavor and aroma. Good for baking and eating out of hand.

SWEET DELICIOUS—One of the best winter sweets. Large and attractive in size, color, and shape. Recommended for a dessert and baking variety. November to January.

TOLMAN SWEET—Yellow tinged with red. Very sweet. Hardy and productive. November to April.

TWENTY OUNCE (Collamer)—Very large, yellow striped, red, fine quality apple; good keeper. Tree vigorous grower, productive. October to January.

WAGENER—A bright light red apple of excellent quality. Very productive. October to January.

WINTER BANANA—Beautiful pale yellow apple with bright pinkish blush. Excellent quality. Prolific and an early bearer. November to March.

YORK IMPERIAL—Yellow striped with light red. Quality very good. Bears regularly and heavily. December to February.

YELLOW DELICIOUS—A bright golden yellow apple of excellent quality. Firm, crisp, and very juicy. Splendid keeper. October to April. See Page 8 for illustration.

RHODE ISLAND GREENING

This large and superior winter apple is famous over a large extent of country, and is more highly prized for cooking and eating than any other variety. It is a good keeper, but will keep better if picked early. This Greening is a beautiful yellow color when ripe, and an abundant yielder. March to April.

R. I. Greening

Hyslop

CRAB APPLES

**The double purpose tree
—for fruit and ornament**

Besides producing much sought after fruit, the Crab Apple Tree is excellent for ornamental purposes. It will grow on a wide range of soils and will bear every year. The Crab Apple is a prime favorite with the housewife for jellies and preserves. We offer the following varieties at the same price as standard apples.

RED SIBERIAN—An attractive large size, all red crab apple. This variety ideal for jelly.

TRANSCENDENT—Bright yellow with bright red cheek. Productive. August and September.

HYSLOP—Popular because of its large size. Beautiful deep crimson color. Tree is hardy and a reliable cropper, fruiting in September.

DOLGO CRAB—A handsome hardy red crab apple. Vigorous and productive. Very juicy, jellies easily, and makes a rich, ruby red jelly of beautiful color and excellent flavor. Makes exceptionally good cider. Early September.

Satisfied Customers Are Our Best Advertisements

Here are a very few of the many unsolicited letters we have received from our customers testifying as to the quality of our stock, prompt attention in filling orders, and fair dealing. *Read them.*

Oct. 31, 1940

Kelly Brothers Nurseries,
Dansville, N. Y.

Gentlemen:

Our order of trees arrived in the best condition. As we appreciate your prompt and fine service, it will be our pleasure to recommend you to our friends.

Very truly yours,

EMMY WEISS

Lake Larzerne, N. Y.

Oct. 29, 1940

Kelly Brothers Nurseries,
Dansville, N. Y.

Gentlemen:

I have bought nursery stock and fruit trees from several nurseries for several years. The fruit trees just received from you, are the best stock I ever had. The trees were so full of life and health, they will be sure to grow.

Yours truly,

W. K. VAN OLINDA

Plainfield, N. J.

May 13, 1940

Kelly Brothers Nurseries,
Dansville, N. Y.

Gentlemen:

My order of 150 trees of Delicious, McIntosh and Cortland received last Monday were in excellent condition. The trees received from you are the finest I have ever set out. Do not know yet about next year's planting, but I do know that what trees I use will be ordered from Kelly Brothers. I am very much pleased with your stock.

Sincerely yours,

FRED R. EMERY

East Lee, Mass.

Mar. 25, 1940

Kelly Brothers Nurseries,
Dansville, N. Y.

Gentlemen:

Thanks for your appreciation of my order. The reason you get my business is that in 25 years I have failed to find a nursery where I was as well satisfied with the results as with Kelly Brothers. I have tried other nurseries and I always come back to you.

Yours truly,

HOWARD A. WHITE

R. F. D. 2, Fitchburg, Mass.

ANJOU—Is a vigorous grower, hardy and prolific. The pears are of large size, green in color, but often yellowing when thoroughly ripe. Very juicy, luscious, and of the best quality. For late fall and very early winter use, we have no better variety. October to January.

BARTLETT—Justly the leading commercial pear—a leader among canning Pears. Fruit is large, golden yellow in color with a reddish blush on the sunny side. Flesh is tender and juicy, with a delicious musky flavor. Tree is a vigorous erect grower and bears abundantly. Ripens in September.

BEURRE BOSCH—Very popular variety. Very large, gourd shaped pear, brownish yellow in color. Hangs to tree well on account of its long stem, which allows it to sway in heavy winds. White flesh, rich and delicious. Tree very productive. Will keep until Christmas.

CAYUGA (New)—A new seedling of Seckel which it resembles in shape and color. Fruit is as large as Bartlett and of high quality.

Seckel

CLAPP'S FAVORITE—Large, fine, pale lemon-yellow, with brown dots; fine texture, melting, buttery, juicy, with a rich, sweet delicate, vinous flavor. Tree hardy and very productive. Thrives where other varieties fail.

DUCHESS D'ANGOULEME—A most dependable cropper, often fruiting the first season after planting. Fruit large. A dull greenish yellow, spotted russet, flesh white, rich and good quality. October to November.

FLEMISH BEAUTY—This fine old pear is still one of the hardiest and most generally successful over a wide range of country, producing good crops annually of large, handsome fruit that is exceptionally good in quality. September and October.

GORHAM (New)—Resembles Bartlett in size, color, and shape. The flavor is sweet and vinous with a very marked and pleasing aroma. Trees vigorous and productive. Fruit ripens two weeks after Bartlett.

KIEFFER—Large to very large. Skin yellow with light vermilion cheek. Flesh very juicy, with a marked musky aroma. Good quality.

LAWRENCE—Trees healthy, hardy, and very productive. Fruit large; skin yellow, covered with brown spots. Flesh whitish, rich, and aromatic.

SECKEL—A delicious little pear that is the standard of excellence in its class. One of the richest and highest flavored pears known. Yellowish-brown with red cheek. Very productive. August to October.

SHELDON—Large, round, russet, and red pear. Very rich and delicious. October.

VERMONT BEAUTY—Medium, yellow shaded with carmine. Good cropper. October.

WILLARD (New)—One of the best winter pears. Recommended for its high quality and lateness. Has shape and color of Bartlett. Flesh is yellowish, fine grained, tender and juicy.

WORDEN SECKEL—Fruit larger than Seckel. Shaped like Bartlett, but not as large. Yellowish-brown with red cheek. Excellent quality. October.

JAPANESE VARIETIES

ABUNDANCE—Fruit large, very early; amber turning to a rich, bright cherry. Flesh light yellow, exceedingly juicy and tender. Freestone. Excellent for canning.

BURBANK—Fruit is very large, bright reddish purple. Meaty and quite firm. Excellent shipper. Tree hardy, vigorous, and productive. Needs close pruning.

FORMOSA—A midseason variety of excellent and Prolific Bearing Qualities. Large greenish-yellow, overlaid with red.

RED JUNE—Ripens before Abundance. Medium to large; deep vermilion-red; flesh light lemon-yellow; fine quality. Vigorous, hardy; productive.

SANTA ROSA—A proven money maker. One of the best of the Japanese varieties. Resembles Burbank in size and color.

SATSUMA—Large, globular, with sharp point, purple and red with bloom. Firm, juicy, dark red, fine quality flesh.

WICKSON—Sturdy, upright grower. Fruit handsome, deep, maroon-red. Flesh fine texture, firm, sugary, and delicious. Excellent shipper.

★ FELLEMBURG PRUNE

The Reliable Money Maker

Large, pointed and tapering. Dark purple. Juicy and delicious. Early September. Freestone.

EUROPEAN VARIETIES

ALBION (New)—Fruit larger and of better quality than Grand Duke which it resembles. Tree vigorous. One of the best new introductions.

BRADSHAW—Very large, fine early plum, dark violet red, juicy and good. Very productive; valuable for market. Quality is excellent, color attractive. Good canner.

GRAND DUKE—One of the best late plums for market. Large as Bradshaw, same color, entirely free from rot. Late September.

IMPERIAL GAGE—Rather large; oval, greenish; flesh juicy, rich and delicious. Vigorous grower; very productive.

LOMBARD—Medium to large, roundish, dark red. Flesh yellow, juicy. Hardy; prolific bearer. Valuable commercial sort. August.

MONARCH—Very large, bluish-purple. Juicy, golden green flesh. Bears early and abundantly. Excellent for market. September.

REINE CLAUDE (Bavay's Green Gage)—Large, pale yellow, marked with red; good bearer. Middle of September.

SHIPPER'S PRIDE—Large, dark purple. Juicy and sweet, excellent for canning. September.

SHROPSHIRE DAMSON—Medium size dark purple fruit produced in thick clusters. Excellent canner. Tree a good grower and very productive. October.

YELLOW EGG—Golden yellow covered with thick bloom. Tree large, very productive. September.

GERMAN PRUNE—Fruit long, oval, purple with thick bloom. Flesh firm, sweet, and delicious. Excellent commercial sort. September. Freestone.

YORK STATE PRUNE—One of the largest and best. Dark blue, with purple bloom. Delicious. Last week in September. Freestone.

STANLEY PRUNE—Introduced by the N. Y. State Experimental Station, and is becoming a valuable commercial variety. Large, dark blue with thick bloom. Flesh greenish yellow, juicy, and sweet. Bears annually. Midseason.

DWARF FRUIT TREES

**Dwarf Fruit Trees Bring Quick Returns
Often Bear Year After Planting**

FRUIT EASY TO PICK FROM DWARF TREES

On account of the low growing habit of dwarf trees you will find it very easy to pick the fruit. Practically all of the limbs can be reached from the ground. In any event, the most you will need will be a step ladder. Ease in picking is an important item, especially during the busy harvest days.

DWARF TREES BEAR WHEN VERY YOUNG

As the illustration at the right of this page will testify, you will not have to wait long for fruit from dwarf trees. Dwarf trees often bear the year after planting—in fact, it is quite a common occurrence to have fruit on dwarf trees in the nursery row, even before the trees are set out in their permanent locations.

FRUIT ON DWARF TREES LARGER THAN ON STANDARDS

The fruit produced by dwarf trees is the same color and quality as that produced by standard trees but will average larger in size. In fact, many authorities claim that fruit from dwarf trees is not only larger but of better quality.

DWARF APPLE TREES BUDED ON NEW MALLING ROOTSTOCK

Our Dwarf Apple Trees are budded on the New Malling dwarf rootstock introduced recently to this country by Dr. H. B. Tukey of the New York State Experiment Station.

Now you can have several varieties growing in your yard because of the small space required. 15 x 15 is a recommended spacing.

For those who enjoy working with plants, there is a source of much pleasure in dwarf fruit culture, watching the fruit take shape and ripen over the season.

PLANTED A LITTLE OVER A YEAR AND BORE FRUIT

Kelly Bros., Dansville, N. Y.

Gentlemen: I enclose a photo of one of twelve Dwarf Bartlett Pear Trees bought from you and planted last spring. This tree has been visited by dozens and dozens of people and all said they never saw anything like it. I should have a yard stick in the picture as the height of the tree to where this year's growth began is only 34 inches.

R. 6, Butler, Pa.

Yours truly, J. C. HOCH

**Grow All the
Fruit You Can
Use . . . Right
In Your Own
Back Yard!**

DWARF PEAR TREES

All varieties of Pears do not give good results as Dwarfs. We recommend the following varieties to be good growers and bearers and to give the best satisfaction as Dwarfs:

Dwarf Bartlett Pear

Hale Haven

This year we are offering some of the finest Peach Trees we have ever grown, at prices you cannot afford to pass up. Our trees are strong and healthy with a good fibrous root system, and can absolutely be depended upon to be true to name. We cut our buds from bearing orchards and exercise the greatest care in keeping our varieties free from any possible mixtures. For bigger profits it will pay you to plant Kelly's Peaches.

KELLY'S EARLY PEACH TREE COLLECTION

No. 5

5 Largest Size 5-6 ft. Trees

VALUE \$1.75

1 Golden Jubilee	1 Hale Haven
1 Veteran	1 Elberta
1 Valiant	

5 SPECIAL PRICE **\$1.00**

VARIETIES LISTED IN ORDER OF RIPENING—IN WESTERN NEW YORK

MIKADO—The most popular very early yellow. Hardy, productive. Ripens about six weeks ahead of Elberta. Blossoms self-sterile, needs to be interplanted. Early August.

GREENSBORO—Large, bright red over yellow, flesh white. Good quality. Freestone. Late August.

MARIGOLD—Early yellow, excellent quality, semi-cling. Late August.

ORIOLE—A new early peach of high quality. Fruit medium to large in size, yellow fleshed, and a freestone. Trees vigorous and productive. Early September.

GOLDEN JUBILEE—We recommend this New Jersey Experiment Station introduction. Comparatively new, but widely planted; is a real money maker. Unusually hardy, resists excessive cold. Sure cropper, after severe winters and heavy frosts. Golden Jubilee is without equal as an early, large, yellow freestone of highest quality. Flesh is yellow, tender, juicy, and sweet.

KELLY'S heavy-yielding PEACHES

True-to-name trees .. direct from grower to you!

CUMBERLAND—A recent introduction of the New Jersey Experiment Station as a result of a cross between Belle and Greensboro. Vigorous grower and as hardy as Carman. Fruit is large, attractive in color and shape. Flesh is white and almost free.

CARMAN—Large, white fleshed peach of fine quality. Very hardy and productive. Freestone. Early September.

ROCHESTER—A comparatively new extra early peach of the highest quality and most delicious flavor. Large yellow, with attractive red blush. A very fine canner, prolific, and an early bearer. Freestone. Early September.

VEDETTE—Ripens a few days before Valiant, and three weeks before Elberta. Fruit is large, roundish oval, yellow fleshed, and a freestone. Superior quality and color. Early September.

HALE HAVEN

Marvelous new peach, a result of crossing the famous J. H. Hale with South Haven. A large beautifully colored, yellow fleshed peach, ripening approximately ten days to two weeks ahead of Elberta. Perfect freestone, strong grower, good shipper and a prolific heavy bearer. The tree is hardy and fruit is of the highest quality. Has extremely high color which is present several days before the fruit ripens, thus allowing early picking for distant shipments. Should be included in every planting.

ELBERTA

The Money-maker!

The leader of all peaches and the greatest commercial variety on the market; 50 per cent of the peaches planted are Elberta. In all probability no peach will succeed over so wide a range of territory as this kind. It will thrive where any peach can be grown. A beautiful peach of good quality, not only the best orchard variety but also valuable for planting in the garden. Elberta is hardier in bud than many varieties, therefore, a more uniform cropper. It is large, yellow, with red cheek, juicy and high flavor; flesh yellow, freestone. Season medium early, following quick upon Early Crawford. Early September.

YELLOW ST. JOHN—Of medium size, orange yellow with a red blush on sunny side. Good quality. Strong grower and prolific. September.

VALIANT—Large, yellow, freestone, juicy, very good quality. Productive. Early September.

Valiant

SOUTH HAVEN—Another excellent new peach well worth planting. Golden yellow with red blush. Large, meaty, and of delicious flavor. Prolific. Freestone. Early September.

HALE HAVEN—(See illustration and description Page 15).

ECLIPSE—Yellow freestone. Seedling of Belle of Georgia introduced at N. J. Experiment Station. Ripens about a week before Elberta and two weeks after Golden Jubilee. Fruit attractive, medium to large size, very hardy.

HILEY BELLE—Large white peach with bright red cheek. Rich and juicy. Excellent shipper. Freestone. Early September.

VETERAN—Large, round, yellow fleshed fruit. Freestone. Since it ripens a few days later than Valiant, it makes a desirable sort to follow that variety. Early September.

FITZGERALD—Very hardy. Large, brilliant yellow with red cheek. Early bearer. Freestone. Middle September.

CHAMPION—Large creamy white with red cheek. Excellent quality. Good shipper. Hardy and productive. Freestone. Middle September.

Winthrop, Maine.
Apr. 21, 1940

Kelly Brothers Nurseries,
Dansville, N. Y.
Gentlemen:

I believe you would be interested in hearing about the 500 apple trees purchased from you last spring. They were set out without a single loss and made a growth, the first season of 10 inches to 3 feet.

Yours very truly,
MRS. JAMES McCROARY

Veteran

BELLE OF GEORGIA—Large, attractive white fleshed peach. Red cheek. Hardy and productive. Freestone. Middle of September.

CRAWFORD'S EARLY—Large yellow peach of the finest quality and flavor. Freestone. Middle of September.

EARLY ELBERTA—An excellent new variety resembling Elberta very closely, except a little rounder in shape and about ten days earlier in ripening. Freestone. Late September.

ELBERTA—See Page 15 for description.

J. H. HALE—An extra large peach, yellow overlaid with crimson. Flesh golden yellow, of delicious flavor. An excellent shipper. A fine commercial variety. Prolific when cross pollenized with some other variety. All of the varieties offered in this catalog are suitable for planting with Hale. Freestone. Late September.

SALBERTA—Large Elberta type, late peach of good quality. Freestone. Early October.

CRAWFORD'S LATE—One of the finest late varieties. Large, yellow, of excellent quality. Freestone. Early October.

SMOCK (Beers Smock)—An old variety, prized for either home use or market. Bears heavy every year. September.

SALWAY—Large; deep yellow, red cheek. Flesh yellow, juicy. October.

SHIPPER'S LATE RED—A rather new late variety that is fast becoming prominent. Ripens a few days after Elberta. Large, yellow flesh, attractive highly colored, freestone peach. Of J. H. Hale type. Ours is the true strain. Buds cut from checked bearing orchards.

Sweet Cherry Trees

BLACK TARTARIAN—Bright purplish black. very large, rich and juicy, half tender. Tree vigorous, erect; heavy bearer. June.

BING—Tree very hardy and vigorous, with heavy foliage. It succeeds in the East better than most sweet varieties. Fruit is large, dark brown or black, fine quality, delicious. Good shipper, ideal for commercial purposes.

GOVERNOR WOOD—Fruit light yellow, marbled light red, large, heart-shaped, rich, sweet, and juicy. Productive.

LAMBERT—Purple-red in color, rich and firm. Considered one of the largest of all cherries. Enormous crops every year. Free grows well and is proof against fungous and insect attacks. Fine shipper.

NAPOLEON (Royal Ann)—Good for market and canning. Large size, beautiful cherry, pale yellow with bright red cheek; sweet, juicy, and firm. The leading white sweet Cherry.

Windsor

Fruit very large, juicy and firm; flesh pinkish and sometimes streaked. Good quality; excellent bearer. Tree upright, vigorous, and rapid grower. Popular for its large size and dark color; almost black. One of the leading commercial sorts, July.

SCHMIDT'S BIGAREAU—Large size fruit of deep mahogany color. Flesh dark, very juicy, tender, and has fine rich flavor. An excellent shipper. Fruit grows in clusters. July.

YELLOW SPANISH—Pale yellow with bright red cheeks. One of the best, most beautiful, and

BLACK GIANT—One of Burbank's introductions. Tree large, vigorous and very productive.

Large black fruit late in season. Excellent quality.
SENECA—Similar to Black Tartarian in color and size, which it precedes by two weeks. Tree hardy and prolific.

MONTMORENCY

... the Leading Sour Cherry

LARSEN MONTMORENCY. "Best of Cherry." Fruit is good-sized, firm, heart-shaped, bright red, flavored and bright clear red. The canning factories are always falling for them and buy them by the hundreds of tons. The best of all sour varieties, is a good shipper, very attractive and always brings good prices. The trees are the cleanest and best growers and are less subject to disease, less affected by wet weather, and are the best bearers of all other sour varieties. Montmorency can always be depended upon for a full crop, no matter how unfavorable the season may be. Fruit ripens ten days after early Richmond.

Sour Cherry Trees

We are one of the largest producers of Cherry trees in the United States. Sixty years' experience—ideal soil and climatic conditions all combine to produce the finest to be had in Cherry trees. Our Cherries are all upland grown, thus assuring a healthy, vigorous root system. Cherry trees require a well drained soil.

DYEDHOL SE. Very hardy, and undoubtedly the earliest cherry—ripening ten days earlier than Richmond. Fine quality, has smallest pit of any cherry known; a splendid keeper. Unsurpassed for canning and desserts. June, good. A splendid pit cherry. Tree very hardy, somewhat smaller than other sorts, but exceedingly productive. This fruit is in great demand by the fruit-juice manufacturers. July,

EARLY RICHMOND—The good old variety that bears such large crops in the gardens, most handy of all varieties, unimpaired by severe winters. One of the most valuable and popular varieties, unsurpassed for cooking purposes. Tree slender in growth with a roundish spreading head. Ripens through June and bears good crops almost every year.

MAY DUKES—The color of this cherry gradually changes from a bright red to nearly black when fully ripe. Flesh is red, changing to dark purple later; is very juicy, rich, acid, and of superior quality. An abundant bearer and very hardy. Season very early and fruit must remain on the tree until fully ripe to develop its best character.

ENGLISH MORELLO—Fruit large, elongated; almost blackish red when fully ripe; very rich, acid; juicy and

OSTHEIM—Large; skin red, dark at maturity; flesh liver-colored; tender, juicy, almost sweet; very good; hardy.

OSTHEIM—Large; skin red, dark at maturity; flesh liver-colored; tender; juicy, almost sweet; very good; hardy.

Wayne County Orange Quince

Your winter fruit supply is not complete without quinces. Their different tangy flavor makes them excellent for preserves or jelly.

Trees are very dwarf growing, thriving in any good rich soil. We recommend these varieties:

CHAMPION—Fruit very large, fair, and handsome. Bears abundantly while young. Flavor delicate, imparting an exquisite quince taste.

ORANGE—Popular, extensively cultivated, reliable, and satisfactory. Roundish, bright golden yellow, very large, fine grained, fine quality. Best for cooking.

WAYNE COUNTY ORANGE—A superior new variety introduced largely through our efforts. Extra large, golden yellow, of excellent quality. Regular cropper. Ripens early September.

APRICOTS DELICIOUS FRUIT EASILY GROWN!

This is a rich, delicious fruit, coming between cherries and peaches. It is very much like the peach in outward appearance, but like the plum in quality and texture. The apricot ripens a month or more before the best early peaches come in, which explains the reason for the great demand and prevailing high prices. It should be planted in deep, rich soil; and care should be taken to know that the sub-soil as well as the top-soil is dry.

PRICES OF APRICOT TREES

			Each	Ten
1 Year	4 to 5 ft.	9/16 and up	\$.60 \$5.00
1 Year	3 to 4 ft.	7/16 to 9/1650 4.00

HARRIS—A hardy English sort. Medium size; oblong, orange, good quality, very early. One of the best varieties in the East. July.

MOORPARK—Very large, deep yellow, with red cheek. Has the highest quality and finest flavor of all apricots. August.

EARLY GOLDEN—Medium, roundish oval. Skin smooth, pale orange. Flesh yellow, moderately juicy and sweet, with very good flavor. Freestone.

HUNTER (Nectarine)—Fruit is large, round, yellow with a heavy blush. Freestone, with the true nectarine flavor. Ripens midseason. Tree vigorous and productive.

Wilder

WILDER CURRANT

**Recommended as Best
Commercial Variety**

**PRICES—Extra Strong, 2 Year Bushes, 20c each
\$1.75 per 10, \$12.00 per 100**

WILDER—An unsurpassed commercial sort. Bunches and berries very large, bright attractive red. Hang on bushes well and of excellent quality. Productive.

Write us for Special Prices on Large Quantities

RED LAKE

The new giant red currant. The berries are a pleasure to pick, being large, dark red in color, and on long well filled branches. Very hardy. Ripens over a long season. Supply limited.

2 Yr. No. 1 Plants—35c each, 10 for \$3.00, 100 for \$20.00

RHUBARB

Your Spring Tonic!

Rhubarb is the earliest available material for pies and sauce. Every family should have a few roots, for there is nothing in the fruit or vegetable line that is so beneficial to the human system in the Spring months. **Prices of Extra Strong Two Year Roots: 20c each, \$1.75 per 10, \$10.00 per 100**

MYATT'S LINNAEUS—The best known and most widely planted variety. Large, early, tender—not the least tough or stringy—with mild subacid flavor. Excellent for pies or sauce, and very desirable for canning. Plant 3 or 4 feet apart in rich garden soil.

NUT TREES

HAZEL NUT (Filbert)—A slow growing low tree that bears young and prolifically. Does well where peaches succeed. 4 to 5 ft. trees, **75c each.**

BLACK WALNUT—Grows from 40 to 60 feet high. Large crops of nuts with rough hard shell containing rich, oily kernels of fine flavor. Trees 4 to 5 ft. high, **\$1.00 each.**

BUTTERNUT—Large longish nuts with sweet, oily, nutritious kernels. Trees 3 to 4 ft., **90 cents each.**

ENGLISH WALNUT—A fine lofty growing tree, producing large crops of thin shelled delicious nuts. Trees 3 to 4 ft. high, **\$1.10 each.**

VITAMIN-RICH ASPARAGUS

You'll be surprised how easy it is to grow Asparagus sufficient for a family of four or five. It is very healthful, rich in minerals and vitamins. Every garden should have some. Room required is very small. Complete planting and cultural directions sent free with each order.

MARY WASHINGTON

The Outstanding Variety

This is, without doubt, the best variety grown at this time. It is a very strong grower, stock of giant size, green color, rich and tender. In addition to being very productive, it is rust resistant and a bed will last for years.

**PRICES—Extra Strong 2 Year, 60c per 25, \$1.75 per 100

CONCORD SEEDLESS (Black)—New attractive garden novelty. No seeds, plants vigorous, hardy. Fruit small and of fine flavor. **75 cents each, \$6.00 per 10.**

NIAGARA (White)—The most popular white grape. Bunches and berries extra large. Vigorous, productive, and a good keeper. Midseason.

PORTLAND (White)—Earliest white grape. Vigorous, hardy, and very productive. Berries large and sweet.

SENECA (White)—New pure vinifera. Best dessert variety. Flavor sweet, vinous and aromatic. Plant vigorous, productive, hardy. **75 cents each, \$6.00 per 10.**

SHERIDAN (Black)—An improved Concord, with firmer, sweeter berries. Large and more compact. About a week later. **25 cents each, \$2.00 per 10, \$15.00 per 100.**

WORDEN (Black)—A large early black grape of fine quality. Berries and bunches large.

VAN BUREN (Black)—Best new very early grape. Desirable for home and commercial planting. Resembles Concord in size, but much sweeter. **75 cents each, \$6.00 per 10.**

BLUEBERRIES

**PRODUCE FOR MORE
THAN HALF A CENTURY!**

Cultivated Blueberries grow in large clusters, plump, tender, and practically seedless with the delightful tang of the wild fruit. In addition to bearing large crops, it is a nice bush to add attraction to a lawn or garden.

Blueberries require an acid soil which contains an abundance of peat moss or other partly decayed vegetable matter. If your soil is deficient in this material, a heavy application of peat, rotted sawdust, or other material should be made and worked into the top 6 inches of soil.

Plant 3 to 4 ft. apart in rows 6-8 ft. apart. Will produce satisfactorily for 50 years, or more. For proper pollination, plant two or more varieties. We recommend the following:

CABOT (Early)—Bush is rather low and spreading, seldom reaching a height exceeding 4 feet. One of the earliest varieties, a good producer, excellent flavor, and a good shipper. Fruit is large, firm, and attractive.

RANCOCAS (Mid-season)—Popular. Ripens about 2 weeks after Cabot. The bush is tall, vigorous, and pro-

Rancocas

ductive. The fruit is large, light blue, firm, and attractive.
RUBEL (Mid-season to Late)—Tall, well shaped bush, attractive appearance, excellent producer, good quality slightly tart berry.

JERSEY (Late)—Tall, well shaped bush, attractive appearance, excellent producer. Large, good quality berry.

STRAWBERRIES

Fresh From Your Garden

Dorsett

DORSETT—An extra early self-pollenizing offspring of Premier. Does well on poor soil. Berries large, evenly matured, light bright red. Excellent for market or home use.

FAIRFAX—Another excellent new variety, ripening early, about the same time as Premier. Very vigorous and a fine plant maker.

PRICES—25 plants 50c, 50 plants 75c, 100 plants \$1.00, 500 plants \$4.00, 1000 plants \$7.50

All Strawberries sent Postpaid or Express Prepaid

PREMIER—An early, productive variety of unsurpassed quality.

CATSKILL—Plants large, very vigorous, yield very heavy crops. Berries very large, slightly irregular in shape, moderately firm, dark red, but glossy and attractive, mild subacid and good quality.

EVERBEARING VARIETIES

PRICES—25 for 75c, 50 for \$1.25, 100 for \$2.00, 1000 for \$11.00

GEM—Very hardy, plants freely. Berry is dark red, large, sweetish tart flavor. Plants medium in size and immune to disease.

MASTODON—Without question the finest of the Fall or Everbearing varieties. It produces an immense crop in June and an abundant crop in the fall. Most prolific of all the Fall varieties.

KELLY'S

RASPBERRIES

PRICES (Except as Noted)

\$1.00 per 25, \$2.50 per 100, \$20.00 per 1000

CHIEF (Red)—The finest early red raspberry for general planting. Large, firm, and a very heavy yielder. Ripens 10 days before Latham.

CUMBERLAND (Black)—Large, glossy black, firm, of excellent quality. Hardy and productive. Early to Midseason.

COLUMBIAN (Purple)—A fine commercial sort. Vigorous, very productive, excellent canner. Fruit large, purple, firm. Midseason.

INDIAN SUMMER—New, Everbearing Red Raspberry. Berries large, conical, much superior in quality and size to any of this type. \$1.50 per 25, \$3.75 per 100.

LATHAM (Red)—Large, round, firm, brilliant red. Most profitable commercial variety. Hardy, very prolific, an excellent shipper and a perfect variety for canning. Early. Ripens evenly over a very long season.

MARCY (Red)—First introduced in 1936 this variety is fast gaining in prominence. Desirable for market and home use. Good quality, vigorous, productive. \$1.50 per 25, \$3.75 per 100.

NAPLES—A new hardy, productive Black Raspberry, resistant to disease. Fruit large, firm, attractive, and of good quality.

NEWBURG (Red)—A new variety of excellent color and quality. Very large and firm. Fine keeper and shipper. Vigorous, hardy, and very productive. Three or four days earlier than Cuthbert.

PLUM FARMER (Black)—One of the best commercial sorts. Berries large, thick meaty, firm. Very productive. Early Midseason.

ST. REGIS (Everbearing)—A bright crimson berry of excellent quality. Fruit commences to ripen with the earliest and continues to ripen on young canes until October.

SODUS—New Purple Raspberry from New York Experimental Station. Fruit is large, firm, medium purple color, and does not crumble. Plants hardy and very productive. \$1.25 per 25, \$3.00 per 100.

TAYLOR—A new Red Raspberry introduced by the New York State Experimental Station. Plants are vigorous, hardy, and productive. Long, conical shape, firm, thick flesh. Excellent quality, ripens just before Latham.

Price \$1.25

Blowers

Immense, delicious **BOYSENBERRY** *The new, sensational berry discovery!*

The amazing new berry, a cross of the Blackberry, Raspberry, and Loganberry, and is far more vigorous than any of its parents. It is immense in size and when you taste it, you will agree that in flavor it stands supreme. The fruit when fully ripened will literally melt in your mouth. A distinctly different, very pleasant flavor, no core and very few seeds, make it a most delicious berry for eating fresh, for pies or for canning. If you want a real treat, here it is.

It makes considerable horizontal growth as compared to its height. For easy picking, plants should be trained on a fence or wires. Plants are strong, vigorous, and quite hardy. However, we advise covering with straw or hay in Winter in cold climates to avoid Winter injury.

PRICES

Flowering

SHRUBS

PRICES (Except as Noted)—Strong Two Year Bushes
2 to 3 ft. 40c each, \$3.50 per 10

ALMOND (*Prunus Glandulosa*)—A beautiful erect growing shrub reaching a height of 4 to 5 feet. Very attractive in May with its dainty double pink blossoms, which cover the branches in a cloud of bloom.

ALTHEA (*Rose-of-Sharon*)—Tall growing shrub from 6 to 8 feet. Very effective for group and specimen planting. Blooms freely from Midsummer until frost. Choice of Purple, Red, White, and Pink. All double flowering.

BEAUTY BUSH (*Kolkwitzia*)—Beautiful bell shaped pale pink flowers during June in great profusion. Grows to about 6 feet in height and produces long arching branches. Foliage attractive. **Price—18 to 24 in. 50c each, \$4.50 per 10.**

BUTTERFLY BUSH (*Buddleia, Ile de France*)—A new variety of more uniform moderate growth. Violet purple clusters bloom in great abundance in Midsummer Sweet, fragrant. 4 to 5 feet.

DEUTZIA GRACILIS—One of our best low growing, flowering shrubs. White flowers in graceful upright clusters in May and June. 2 feet.

DEUTZIA PRIDE OF ROCHESTER—Grows 5 to 6 feet tall. Beautiful double white flowers tinged with rose in May. One of the best popular shrubs.

FORSYTHIA (*Golden Bell*)—Branches are literally covered in early spring with golden bell shaped flowers. The finest early blooming shrub. 6 feet.

HONEYSUCKLE, TARTARIAN—In May and June it is covered with charming pink flowers, followed by clusters of red berries. Attains a height of 8 feet.

HYDRANGEA ARBORESCENS (*Hills of Snow*)—A very beautiful and showy shrub. Ball shaped clusters of pure white flowers from July to September.

HYDRANGEA P. G.—Popular late summer blooming shrub. The immense cone-shaped blooms are white at first then turn pink and bronze. Grows in sun or partial shade and makes a shrub 4 feet tall.

MOCKORANGE (*Philadelphus Coronarius*)—Tall, hardy, and vigorous. Blooms in May, in graceful sprays of large, white, fragrant flowers. 8 to 10 ft. tall.

INDIAN CURRANT (*Coralberry or Red Snowberry*)—Dwarf shrub of graceful habit. Rose colored blossoms in June and July, followed by dull red coral colored berries.

Weigela, Eva Rathke

French Lilac

Spiraea Anthony Waterer

Forsythia

Japan Quince

JAPAN QUINCE (*Cydonia Japonica*)—Completely covered with dazzling scarlet flowers in May, followed by small quince shaped fruits. Grows 4 to 6 feet tall. No planting is complete without one of these plants.

KERRIA JAPONICA—A medium dwarf shrub with beautiful globe shaped flowers of bright orange during July. The branches are green in winter and therefore showy. Grows 4 to 6 ft.

PHILADELPHUS VIRGINALIS—Wonderful new Mock Orange. Has very large, semi-double blooms, pure white. Tall grower.

PLUM, DOUBLE FLOWERING (*Prunus Triloba*)—Completely covered in May with double rose-like pink flowers. Grows medium tall and succeed everywhere. A very beautiful shrub. **Special Price—3 to 4 ft., 50c each; \$4.50 per 10.**

SPIRAEA ANTHONY WATERER—A crimson flowered dwarf variety. Makes low compact bush never getting higher than 2 feet. Covered with blossoms all Summer. Hardy and adapted to wide range of soils. 18 to 24 inch.

SPIRAEA THUNBERGI—A graceful shrub with bright green, fine feathery foliage which turns orange scarlet in the fall. Blooms in late April with abundant white flowers that almost cover the branches.

SNOWBERRY (*Symphoricarpos R.*)—A well-known shrub with small pink flowers in June, followed with clusters of waxen white berries which remain during winter. Grows about 4 feet tall. Is recommended for shady places.

SNOWBALL (*Viburnum Opulus Sterilis*)—Globular clusters of white flowers around Decoration Day.

LILAC (*Syringa Vulgaris*)—The much desired common lilac. Can furnish either the purple or white variety.

RED-LEAVED BARBERRY—A brilliantly colored shrub with its bronzy red leaves all season. Scarlet berries throughout the winter. Likes plenty of sunlight.

WEIGELA CANDIDA—Blossoms very profusely from June until fall, with a large showy white flower. Vigorous grower—6 to 8 feet.

WEIGELA EVA RATHKE—Grows from 3 to 5 feet high. Deep scarlet blossoms in June and intermittently all summer. Very distinctive and attractive.

WEIGELA ROSEA—One of the choicest of all shrubs. Tall grower with deep pink flowers in profusion in June and throughout summer.

SPIRAEA VAN HOUTTEI (Bridal Wreath)

Most popular flowering shrub. Suitable for hedge or specimen planting. White flowers in clusters during May and June. **Price—3 to 4 ft., 20c each; \$1.50 per 10, \$10.00 per 100.**

FRENCH LILACS

Gorgeous budded French Lilacs, successfully and easily grown. Varieties listed are the best double flowering types.

Large 2 to 3 ft. size, 75c each; 10 for \$6.00

Des Fontaines—Flower large, double, violet blue.

Emile Lemoine—Finest almost pure pink.

Jean Mace—Bluish-mauve. Free flowering and thrifty grower.

Michel Buchner—Large pinkish-lilac. Narrow clusters. One of the most popular varieties.

HEDGES

Barberry Thunbergi

The Best All-Purpose Hedge

A shrub of marked excellence because of its bright green foliage which changes to brilliant colors in the Fall, and its bright scarlet berries which are very conspicuous throughout the Winter. Their habit is dwarf and regular spreading. Grows well in the shade and extensively used in landscape work. It is very hardy and has never been known to Winterkill. It bears and shears well and makes a dense hedge.

12 to 18 inches high, **15c each, \$1.25 per 10**
\$10.00 per 100

18 to 24 inches high, **20c each, \$1.75 per 10**
\$15.00 per 100

Barberry Thunbergi

CALIFORNIA PRIVET—Best trimmed hedge 3 to 5 ft. high. Set in single row 10 inches apart. If broad hedge is desired plant in double rows—rows 1 foot apart and bushes 1 foot apart in each row, but staggered so as to come 6 inches apart in hedge. Strong bushes, 2 to 3 ft. high. **\$1.00 per 10, \$4.00 per 100.** Extra strong bushes 3 to 4 ft. high, **\$1.25 per 10, \$6.00 per 100.**

AMOR RIVER PRIVET—A hardy vigorous grower recommended for sections too cold for California Privet. Strong bushes, 18 to 24 in., **10c each, \$1.00 per 10, \$6.00 per 100.**

FRAU KARL DRUSCHKI (Hybrid Perpetual)—Magnificent snow-white blooms. Fully double and of perfect form. Extremely vigorous in growth.

GLOWING CARMINE—The name appropriately describes this beautiful new rose. Strong grower with nicely shaped buds. Glowing lasting color.

GOLDEN DAWN—Large, double flowers of lemon-yellow, nicely formed and very fragrant. Attractive foliage, healthy.

GRUSS AN TEPLITZ—Large, bushy, shrub-like plant with medium sized double blooms of brilliant crimson, velvety and fragrant. Blooms till frost.

K. A. VIKTORIA—Creamy buds. Perfect snow-white blooms, tinted lemon-yellow at center; fragrant. Best white. Constant bloomer and a strong grower.

MARGARET McGREDY—Double, cup-shaped flowers, open orange scarlet, turning a peculiar shade of carmine rose.

MRS. CHAS. BELL—Dainty dawn pink. A delicate soft color of the most exquisite shade, very fragrant.

PINK DAWN—A fine deep rose-pink flower, opening to lively pink with an orange base. Sweetly fragrant.

PINK RADIANCE—Vigorous, free blooming flowers of two-toned pink, light silvery tone inside and deeper on outside. The standard pink rose.

PRES. H. HOOVER—Yellow, orange and scarlet in a luscious blend of color. Large blooms on long stems. Free bloomer.

RED RADIANCE—Clear, genuine red; fragrant. One of the best reds, vigorous free bloomer.

ROSLYN—Beautiful tapering buds and large double flowers of golden yellow. Vigorous compact habit, many flowers.

SISTER THERESE—Golden yellow; bud touched with orange carmine. Exquisite long pointed bud.

TALISMAN—Vigorous, constant bloomer. Easy to grow. Opens into a beautiful mixture of golden yellow orange, and scarlet; variety in every bloom.

Helpful Suggestions to Planters

CARE OF YOUNG TREES ON ARRIVAL

In planting nursery stock, one must remember that he is handling a perishable article, and in order for success the trees and plants must be handled properly on arrival. If for any reason the trees cannot be planted at once, we recommend the following procedure:

Boxed shipments should be kept intact in a cool place where the trees will not dry out. They

can be kept in the box for a week to ten days without harm. Smaller baled shipments should be opened and placed in a cool, damp shelter, such as an ordinary house cellar. The roots should be kept damp and covered with burlap or other such material. Do not unpack trees and heel them in the ground where they are exposed to the drying winds and sun before planting.

POLLINATION OF FRUIT TREES

The value of pollination in the production of a fruit crop is now recognized. Although many varieties are self-fruitful and thus require no pollination from another variety, experiments show they are greatly benefited by cross pollination. Necessarily because of the lack of space available, we are only able to give brief notes on this important topic. For more detailed information, we suggest that you write to your State College or Experimental Station, the address of which we would be pleased to furnish on request. If you do not care to give attention to this detail, just write, stating the number of trees you wish to plant, and we will be pleased to be of service and suggest the best combinations.

APPLES—Varieties such as McIntosh, R. I. Greening, Red Gravenstein, and Northern Spy set little fruit without the assistance of an efficient pollinator. Good varieties to use for pollination are Cortland, Wealthy, Delicious, and Macoun.

PEACHES—With the exception of Mikado and J. H. Hale, all the varieties we offer are self-fruitful.

CHERRIES—Sweet Cherries are self-unfruitful, so must be interplanted. Where Napoleon, Bing, and Lambert are to be planted together another variety such as Windsor or Black Tartarian must be added as the first three will not pollinate each other. The Sour varieties are self-fruitful.

PEARS—Most varieties of pears do not set a good crop when planted alone. Pollination is therefore necessary, and the only combination that is incompatible is Bartlett and Seckel.

PLUMS—With the exception of the Prunes, Fellemburg, German, Stanley, etc., which are self-fruitful, plums should be inter-planted to insure a set of fruit—European varieties for pollinating that class and Japanese sorts for those varieties.
